

Commercialize Your Reagents

with help from the
U.Va. Patent Foundation

“UVAPF staff is knowledgeable and easy to work with, and they have successfully marketed many of the monoclonal antibodies generated in my lab.”

—Tony Frankfurter,
Ph.D., Department
of Biology

What

Disclose any reagents you've developed, including:

- **Antibodies (mono- and polyclonal)**
- **Mouse strains**
- **Cell lines**

and the U.Va. Patent Foundation will market your reagents to companies like Millipore, Invitrogen, Promega and many others that could make your reagents commercially available.

Why

You'll receive the following benefits, **free**:

- We'll help you advance your field by fulfilling your obligation to **disseminate reagents to your peers**.
- For many reagents, we take care of the **packing, shipping and distribution**, taking the burden off you and your lab.
- Your reagents will **generate income** for you, your lab and U.Va. whenever they are purchased by another institution.

How

It's easy! Simply submit the Reagent Disclosure Form, online at:

www.uvapf.org/disclosure
